PROFESSIONAL SUMMARY

Final-year Computer Engineering student with experience building AI-powered full-stack web applications and scalable backend systems. Skilled in full-stack development, cloud infrastructure, REST APIs, RAG pipelines, and modern AI integration. Passionate about developing practical, user-focused solutions and contributing to innovative engineering teams through strong analytical and problem-solving skills.

EDUCATION

Sinhagad Academy of Engineering, Pune

B.E. Computer Engineering · GPA: 8.16/10.0

Aug 2023 – May 2026

Coursework: Artificial Intelligence, Advanced Data Science, Database Systems, OOP, Data Structures & Algorithms

K.K. Wagh Polytechnic, Nashik

Diploma in Computer Technology · 85.60%

Aug 2020 – May 2023

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Java

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, REST APIs, Springboot, JWT

AI & ML: LLM Orchestration, RAG Pipelines, Vector Embeddings, Prompt Engineering

Databases & Cloud: PostgreSQL, MongoDB, Firebase, AWS

Tools: Docker, Git/GitHub, Postman

EXPERIENCE

Software Development Intern · Xmega, Pune

Jan 2025 – Mar 2025

- Architected and launched a production-grade e-commerce web app (React, Node.js, MySQL) with seamless checkout and real-time inventory tracking, serving live client users from day one of deployment.
- Refactored 12+ API endpoints and optimised SQL query execution plans, achieving an 18% reduction in average server response time and laying groundwork for high-traffic scalability.
- Mentored 4 student capstone teams on frontend architecture and backend design patterns, cutting average project turnaround by 25% and improving code maintainability across all submissions.
- Collaborated with cross-functional stakeholders on feature scoping, sprint planning, and code reviews within an Agile environment, accelerating release cadence by an estimated 15%.

Web Developer Intern · Sachitech Pvt. Ltd, Nashik

Jun 2022 – Oct 2022

- Led a 3-person team to redesign the company's official website using HTML, CSS, JavaScript, and React, delivering a 25% improvement in page performance metrics and a fully responsive UI.
- Diagnosed and resolved critical bugs across 5+ active production projects, reducing release-cycle errors by 20% and ensuring stable feature rollouts each sprint.
- Coordinated backend integrations and code reviews with cross-functional teams, streamlining release workflows and accelerating project delivery timelines across multiple client engagements.

PROJECTS

Eco-Swap — AI powered Local sustainable ,Item Exchange and Charitable Platform

2025-2026

React · Node.js · Express.js · Firebase · Python(ML) · TeamLeadership

- Led development of a full-stack sustainability platform with 500+ users for free item exchange, donations, and reusable goods sharing to reduce waste and support eco-friendly communities.
- Built an AI-based item recommendation system using Python and ML, improving exchange match accuracy by 40% and boosting overall user engagement.
- Implemented user trust scores, verification, and fraud detection features, increasing successful and reliable exchanges by 35% across the platform.
- Developed an AI-powered admin dashboard to manage 1,000+ listings, track user activity, analyse exchange trends, and generate BI insights for platform growth.

ResearchCopilot Pro — AI Research Intelligence Platform (In Development)

2026 – Present

Next.js 14 · FastAPI · Anthropic API Key · Supabase (PostgreSQL + RLS) · Stripe · Github

- Building an AI-powered SaaS research platform integrating arXiv and Semantic Scholar APIs with RAG pipelines and vector embeddings for paper analysis, clustering, and research gap detection.
- Developed a multi-paper literature review generation engine with DOCX, LaTeX, and BibTeX export support, streamlining structured academic workflows and research documentation.
- Implemented RBAC, Supabase RLS, and Stripe-based subscription management supporting Free, Pro, and Team plans with secure access control and usage tracking.
- Designing scalable backend architecture, automated CI/CD workflows, and optimized data-processing pipelines for future production deployment.

RESEARCH & ACHIEVEMENTS

- "AI as a Collaborative Tool: Enhancing Workplace Efficiency Without Replacing Human Jobs" — IJSREM, Apr 2025. Analysed ethical frameworks for enterprise human-AI collaboration.
- "Social Productivity Platform: A Study of Collaboration, Communication and Productivity" — IJSREM, Apr 2023. Quantified platform impact on team coordination and delivery efficiency.
- Won 2 inter-college project competitions for Opacity Social (KKW Capstone project), recognised for innovation, usability, and project execution excellence.
- Awarded Outstanding Intern at Sachitech Pvt. Ltd. for exceptional contribution to web development and bug resolution across multiple organisational projects.

CERTIFICATIONS

- Udemy: Java Programming, Full Stack Web Development, React Crash Course, Mastering AWS Serverless
- 30 Days of Code (30DC): Master MERN Stack Development, Use of AI Tools in Software Engineering
