PROFESSIONAL SUMMARY

Full Stack Engineer at Scribido Campus and Computer Engineering graduate (B.E. 2026) with a strong foundation in Java and the Spring Boot ecosystem, and hands-on, production experience building scalable web applications with React, Next.js, and Node.js. Skilled in system design, RESTful API development, relational and NoSQL databases, JWT authentication, and CI/CD pipelines, with experience integrating Generative AI APIs and Retrieval-Augmented Generation (RAG) pipelines into production features. Proficient in AI-assisted development with Claude Code. Comfortable working across the stack in Agile teams, from UI to backend and AWS cloud deployment.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), TypeScript, SQL, C++

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend & APIs: Spring Boot, Node.js, Express.js, FastAPI, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC), Input Validation

Databases: PostgreSQL, MySQL, MongoDB, Firebase (NoSQL), Supabase, SQL Query Optimization

Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions, Git, GitHub, Vercel

AI / GenAI: LLM Integration (Anthropic Claude API), Claude Code, Retrieval-Augmented Generation (RAG), Vector Embeddings, Prompt Engineering, LLM Orchestration

Tools & Testing: Postman, API Testing, Unit & Integration Testing, Stripe API

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, System Design, Agile/Scrum

EXPERIENCE

Full Stack Engineer - Scribido Campus Pvt. Ltd., Pune (On-site)

Aug 2026 - Present

- Build in-house full-stack solutions in a fast-paced, product-based startup, shipping **8+ production features** across frontend, backend, and database layers, reducing dependency on third-party platforms.
- Rebuilding a legacy web application backed by a **200+ table relational database**, modernizing the backend architecture and data access layer for maintainability and scalability.
- Collaborate with a **5+ member** cross-functional team in Agile sprints to develop and maintain **10+ RESTful API endpoints** and their supporting database schemas.
- Strengthened reliability by fixing **15+ bugs**, and adding input validation and security hardening across the application.
- Use **Claude Code** and AI-assisted workflows to accelerate end-to-end delivery, from requirements and implementation to testing and deployment, cutting feature turnaround by **~25%**.
- Participate in Git-based code reviews and pull-request workflows, keeping changes small, tested, and easy to review.

Software Development Intern - Xmega, Pune

Jan 2025 - Mar 2025

- Architected and launched a production-grade full-stack e-commerce web application (React, Node.js, MySQL) with real-time inventory tracking, applying enterprise system design and scalability principles.
- Designed, refactored, and optimized **12+ RESTful API endpoints** and SQL query plans, reducing average server response time by **18%** and improving scalability for high-traffic loads.
- Mentored **4 student capstone teams** on frontend architecture and backend design patterns, cutting average project turnaround by **25%**.
- Collaborated with cross-functional stakeholders on feature scoping and sprint planning in an Agile/Scrum environment.
- Implemented the MySQL schema and React storefront covering the product catalog, cart, orders, and stock levels.

PROJECT EXPERIENCE

Eco-Swap - AI-Powered Sustainable Item Exchange Platform

2025 - 2026

React | Node.js | Express.js | Firebase | Python (ML) | Team Leadership

- Led full-stack development of a sustainability platform serving **500+ users** for item exchange, donations, and reusable goods sharing.
- Improved exchange match accuracy by **40%** by building a Python ML recommendation system that ranks listings on user behavior and item attributes.
- Increased successful and reliable exchanges by **35%** by implementing trust scores, user verification, and fraud detection.
- Built RESTful Node.js/Express APIs backed by Firebase for listings, exchange requests, and user profiles.

ResearchCopilot Pro - AI Research Intelligence Platform

2026

Next.js 14 | FastAPI | Anthropic Claude API | Supabase (PostgreSQL) | Stripe | GitHub Actions | Vercel

- Shipped v1 of an AI-powered SaaS research platform on Vercel by integrating the Anthropic Claude API with a Next.js 14 frontend and FastAPI backend.
- Automated paper analysis and research-gap detection by designing a RAG pipeline with vector embeddings.
- Secured multi-tenant data by implementing RBAC and Supabase Row-Level Security, and enabled paid plans via Stripe subscription management.
- Automated build and deployment with CI/CD pipelines using GitHub Actions.
- Built authenticated Next.js 14 user flows, including a paper-analysis dashboard and subscription-gated features.

EDUCATION

B.E. Computer Engineering - Sinhgad Academy of Engineering, Pune

Aug 2023 - May 2026

CGPA: 8.28/10.0 | Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, System Design, AI, Advanced Data Science

Diploma in Computer Technology - K.K. Wagh Polytechnic, Nashik

Aug 2020 - May 2023

Percentage: 85.60%

ACHIEVEMENTS & CERTIFICATIONS

- Published 2 research papers** (IJSREM, 2023 & 2025) on [human-AI collaboration](#) and [productivity platforms](#).
- Won 2 inter-college project competitions** (Opacity Social, KKW Capstone).
- Certifications:** Java Programming, Full Stack Web Development (Udemy); MERN Stack Development, AI Tools in Software Engineering (30DC).
